

Preview: The next ID announces itself

The saloon is followed by the estate: VW is celebrating the premiere of the all-electric ID 7 Tourer, which, like its combustion-powered Passat Variant counterpart, aims to impress with plenty of space and a large load volume. But there have also been some changes to the drive, range and infotainment, as we were able to find out at a preview.

Next week, we will also be reporting on what has happened with the new edition of the Dacia Spring. The Honda e-Ny1, which is the brand's second e-launch after the hapless Honda e, has to prove itself in the practical test. But it also falls a little short in some disciplines.

As usual, we will also keep you up to date with the latest news and developments in the automotive industry, the motorcycle sector and transport policy. (aum)
